Dashboard Design

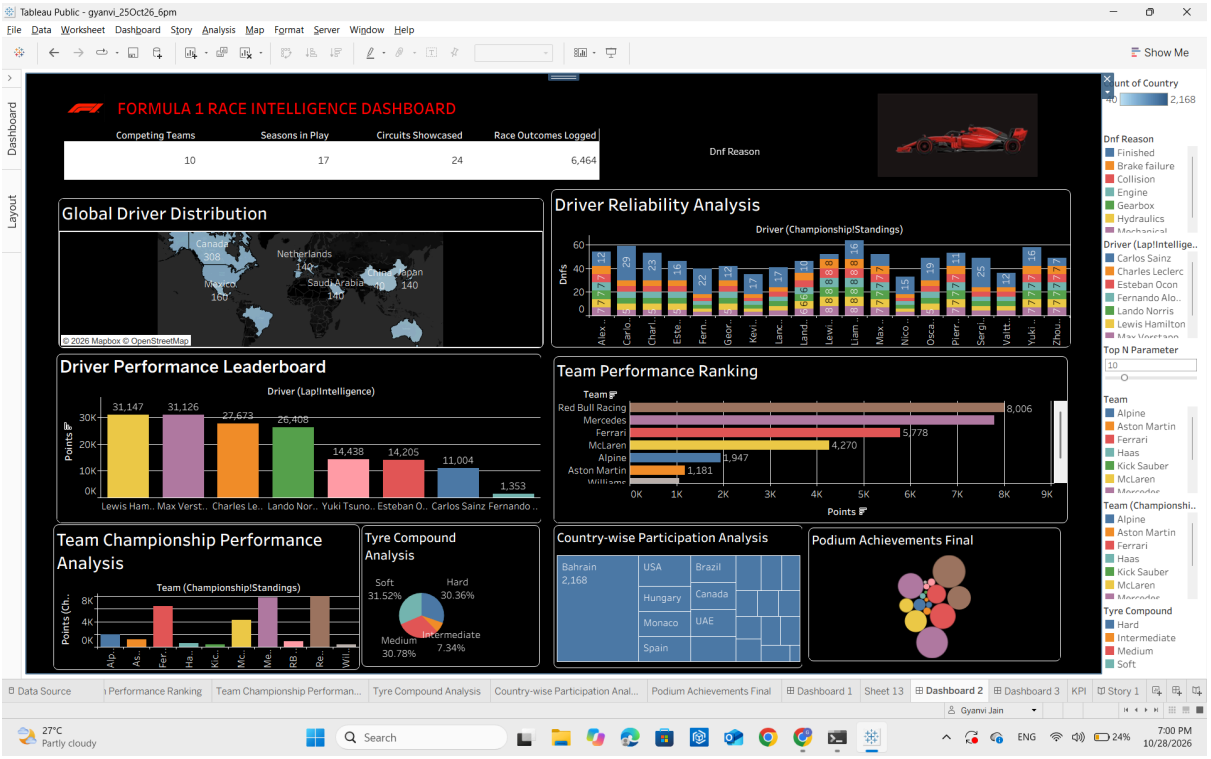

Date	26 October 2026
Team ID	Gyanvi Jain
Project Name	Formula 1 Race Intelligence Dashboard
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Note: Highlight the major outcomes in form of bullet points

Sample:

Here are five potential outcomes from the dashboard image provided:

- Overall F1 Overview: Four KPI cards display the number of competing teams, seasons in play, race outcomes logged, and circuits showcased, providing a quick summary of the dataset.

- Driver Performance Analysis: The driver leaderboard ranks drivers using cumulative points, helping users compare performance and identify leading competitors.

- Race Reliability Analysis: The DNF reliability chart categorises race failures by reason, allowing users to explore patterns across drivers and teams.

- Team Championship Comparison: Team performance visualisations help users compare championship results and performance trends across seasons.

- Tyre Compound Usage: The tyre usage chart shows the distribution of tyre compounds in the available dataset, supporting exploration of tyre-selection patterns.

- Geographic Participation: The map and country-wise visualisation highlight the geographical distribution of race participation represented in the dataset.

- Podium Achievements: The packed bubble chart compares podium achievements by driver and team, making leading performers easier to identify.

- Interactive Data Exploration: The race-year and DNF-reason filters, along with the Top N parameter, allow users to customise the information displayed and explore specific comparisons.
