Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts,

and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Access Dashboard	Stage 2: Explore Data	Stage 3: Analyse Insights
Actions (What does the customer do?)	• Opens the dashboard using Tableau Public or the web application. • Views the overall F1 statistics. • Selects the required analysis.	• Applies filters for DNF reason and race year. • Adjusts the Top N parameter. • Explores charts related to drivers, teams, and tyres.	• Compares driver and team performance. • Identifies DNF patterns and podium trends. • Uses insights to support decisions or prepare reports.
Touchpoint (What part of the service do they interact with?)	• Tableau Public dashboard. • KPI cards. • Dashboard navigation and charts.	• Interactive filters and parameters. • Driver Performance Leaderboard. • Team, tyre, and reliability charts.	• DNF analysis chart. • Championship and podium visualizations. • Dashboard results and shareable views.

Customer Thought (What is the customer thinking?)	• “Can I access all the important F1 statistics in one place?” • “Is the information easy to understand?” • “Which section should I explore first?”	• “Which drivers and teams perform best?” • “What are the common reasons for race failures?” • “How do performance trends change by year?”	• “What patterns can I identify from this data?” • “Which findings are useful for my analysis?” • “How can I use these insights to make better decisions?”
Customer Feeling (What is the customer feeling?)	• Curious. • Interested. • Hopeful about finding useful information.	• Engaged. • Focused. • Interested in discovering patterns.	• Informed. • More confident in interpreting data. • Satisfied with the analysis.
Process Ownership (Who is in the lead on this?)	• Dashboard development team. • Tableau dashboard publisher.	• Tableau dashboard development team. • Data analyst responsible for data preparation and calculations.	• F1 team strategist, broadcast analyst, or technical regulation analyst, depending on the use case.
Opportunities (How can we improve this stage?)	• Make the dashboard easy to access. • Display key KPIs prominently. • Use clear chart titles and labels.	• Make filters easy to locate and use. • Provide clear legends and tooltips. • Improve chart readability and responsiveness.	• Highlight important performance and reliability trends. • Enable easy sharing of findings. • Keep data accurate and visualizations understandable.
